I'm developing web based solutions for more than 10 years with focus but not limited to front-end development. I offer excellent knowledge and multiple years of experience with designing, developing, testing and optimizing scalable web solutions.

I've been working with companies and agile teams of different size and experience, and also took leadership responsibilities, was holding presentations and giving trainings on front-end topics either general or for concrete projects.

Key Skills

JavaScript

NodeJS

CSS 3

HTML 5
